

R2D2

Standup support

the intelligent solution for people with certain handicaps

Being helped is good but to help yourself is better

The Standup support R2D2 is an aid for the use of the toilet for everyone who is restricted in his mobility because of his age or physical disability.

Thanks to its continuous regulation of height and incline, a safe and joint-protecting standing up and sitting down is guaranteed.

Who doesn't like to maintain his privacy, his independency and his comfort in spite of temporary or permanent physical disabilities?

In cooperation with architects, engineers, physicians, therapists and affected persons the R2D2 stand up support was developed and perfectly adapted to their needs.

For this reason a maximum of functionality, security and practical feasibility is guaranteed

advantages:

effortless and easy sit down and get up, variable electrical high and incline adjustment, easy operation, modular structure, minimum space required, everywhere and immediately applicable, no assembly expenditure, solid and safety, adjustable on different bowl heights, achievement with and without bidet

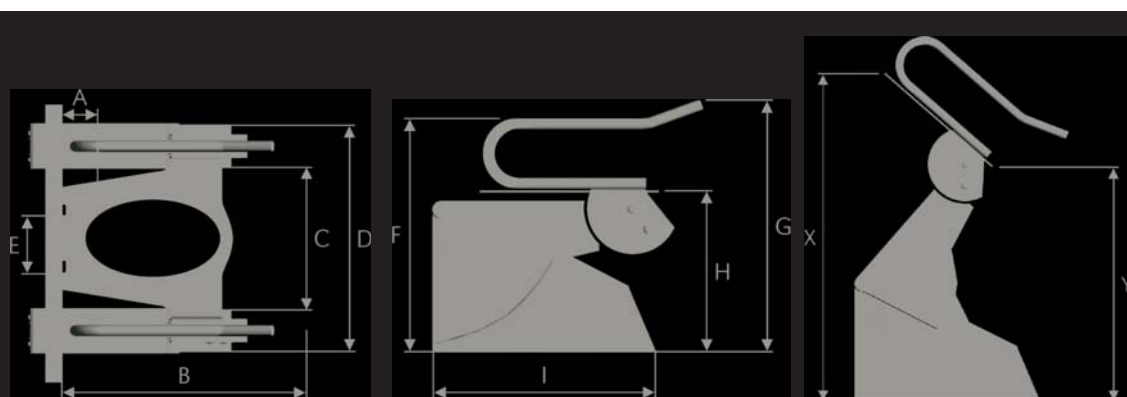

R2D2 stand up support - technical data sheet

mx. height: 610-980 mm (Y-X)
 iclination: 50°
 electrical power input: 230V/50 Hz, 16A
